

# NAVARA

The D40's are a very comprehensive vehicle and there are three different types of kits to suit these vehicles.

The Heavy Duty kit is great for heavy laden vehicles. If the vehicle has been fitted with aftermarket shocks then you will need to go for the kit to suit the 2" lift. Standard Kits also available for the D22 4WD.

4WD  
& 2WD

They can be fitted with the wheels on. They fit to all types of bodies eg. Tray / style side / canopy.
